CAREER PROFILE

Frontend developer with over 2 years coding experience. Mastering modern web technologies and industry standards in every phase of the SDLC to deliver fast, functional, highly efficient, and aesthetically pleasing digital experiences.

TECHNOLOGY SUMMARY

A profile of my public code may be viewed here – https://github.com/muideenpopoola

Languages – HTML, CSS, JavaScript (ES6).

Ecosystems – React.

UI Libraries – Tailwind CSS, Sass, Materialize CSS, Bootstrap, Framer-Motion.

Tools – VsCode, Git.

Platforms – Firebase, Netlify, Vercel, CPanel, Github.

Project Management – Github, Slack.

CMS – Wordpress.

CORE COMPETENCIES

A deep understanding of the core fundamentals of web development. Highly proficient at frontend web development, specializing in Reactjs. Also remarkably skilled at Wordpress, Git, vanilla HTML+CSS+JS, CSS and SVG Animation, HTML emails, Technical documentation & communication. All combined with an insatiable appetite for learning.

PROFESSIONAL EXPERIENCE

CISSA Software Team • *November 2023 to present.*

Volunteer - Frontend Developer. Working with the frontend team to build the faculty Annonimous chat app.

Dev League, Ilorin • *August 2023 to November 2023*

Volunteer - Frontend Developer. Working with the frontend team to build the community website

Several Freelance Projects

• *2021 to Present*

A sample of some of my self-initiated projects may be viewed here – https://github.com/muideenpopoola

EDUCATION

UNIVERSITY OF ILORIN • B sc. Information Technology (Undergraduate)

CURRENTLY STUDYING

- Mastery of Wordpress and the React ecosystem (redux, nextjs, material UI and framer-motion)

- JavaScript Data Structures and Algorithms.

- Learning and adopting Wordpress platform

PERSONAL ASPIRATIONS

- Collaborate on a global scale in a software development career with a reputable tech company.

- To build more immersive and engaging digital experiences with tools like three js, AR & VR. Some inspiring examples for me are https://kodeclubs.com/ and https://atelier.net/virtual-economy/

- To build software aimed at societal change and improving the human condition.

- Settle down. Help the poor. Contribute to humanity. Leave a legacy.

HOBBIES AND EXTRA-VOCATIONAL INTERESTS

In whatever spare time I have, I enjoy coding to relax (what I like to call "chill-coding"), conversations about philosophy, politics, science fiction, and the liberal arts. I also enjoy anime and YouTube. I'm also a debater and a member of Unilorin debate club
